

A technical drawing of a square frame structure. The frame is composed of double lines, suggesting a thick or reinforced edge. The drawing includes dimension lines with arrows indicating the overall width and height of the square. The frame is divided into four quadrants by a central cross, also composed of double lines. The corners of the frame are reinforced with small square blocks, likely representing corner braces or joints. The drawing is a black and white line art, typical of architectural or engineering plans.
